- Remotely monitors the health of the spa

SpaMonitor™ Hot Tub Remote Control

Certificate No. 900854

S P A MONITOR™

Complement your wireless package with the Balboa Dolphin™ floating remote

## Complete In-home Control for Your Backyard Spa

Designed for indoor use, the Balboa SpaMonitor™ is a wireless hot tub control, attractive in style and easy to operate. With an easy to read backlit LCD display and button operation that mounts right to the wall inside your home. Innovative features allow you to display or adjust the water temperature, turn on/off the jets, turn on/off spa or fiberoptic lights, and personalize programming between standard, economy and sleep modes.

## Peace-of-mind

One of the key functions of the SpaMonitor is to continuously monitor the health of your spa. The built in audible alarm will alert if necessary, allowing you to rest easy each and every day. A pleasure to own, the Balboa SpaMonitor will conveniently control your spa.
